PROFILE

I'm passionate about both full-stack development and AI, and I'm actively developing my skills in these areas. I'm seeking a role where I can apply my foundational knowledge, learn from experienced colleagues, and help create innovative solutions.

PROJECTS

Book Recommendation System [↗](#)

This project builds a book recommendation system using collaborative filtering with SVD on the Book-Crossing dataset after cleaning and reducing sparsity. It trains multiple models, selects the best one using RMSE, and generates personalized book recommendations efficiently.

Academic path adviser [↗](#)

The Smart Academic Path Advisor is a centralized platform that helps university students explore majors, access course plans, and receive personalized guidance through MyKAU integration. It reduces confusion, saves time, and enhances academic decision-making, leading to increased student confidence and better advisor-supported outcomes.

EDUCATION

computer science bachelor degree (CS)

King Abdulaziz University (KAU) [↗](#)

GPA 4.66

07/2022 – Present

Jeddah

LANGUAGES

Arabic — Native/Bilingual
